

## Abstract:

This step by step tutorial will help you to understand how to duplicate a window or a set of windows from one wall to a perpendicular wall

This tutorial starts when you have already modeled at least two perpendicular walls and placed a window on one of the walls.

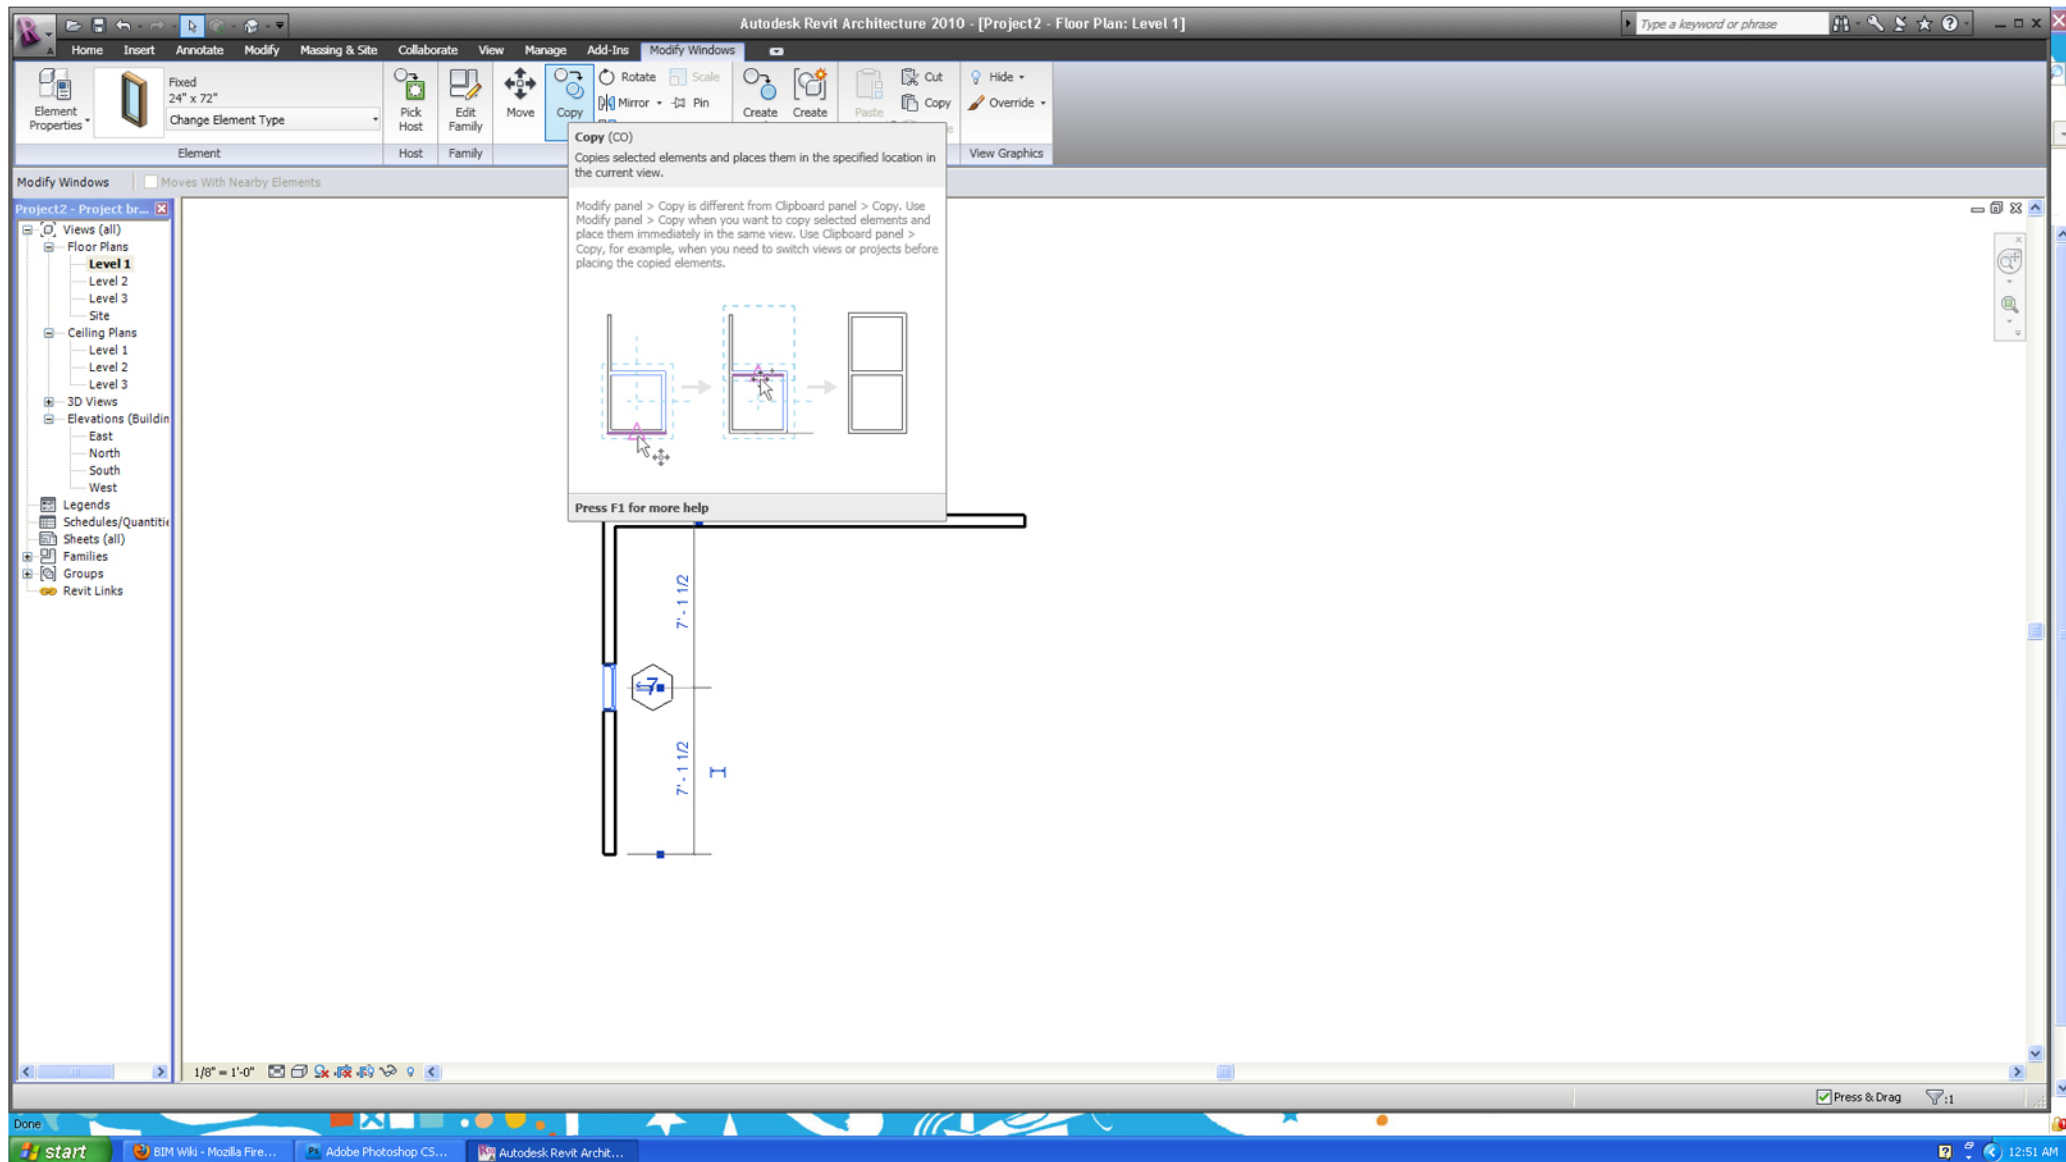

Step 1:  
Select the window you want to duplicate

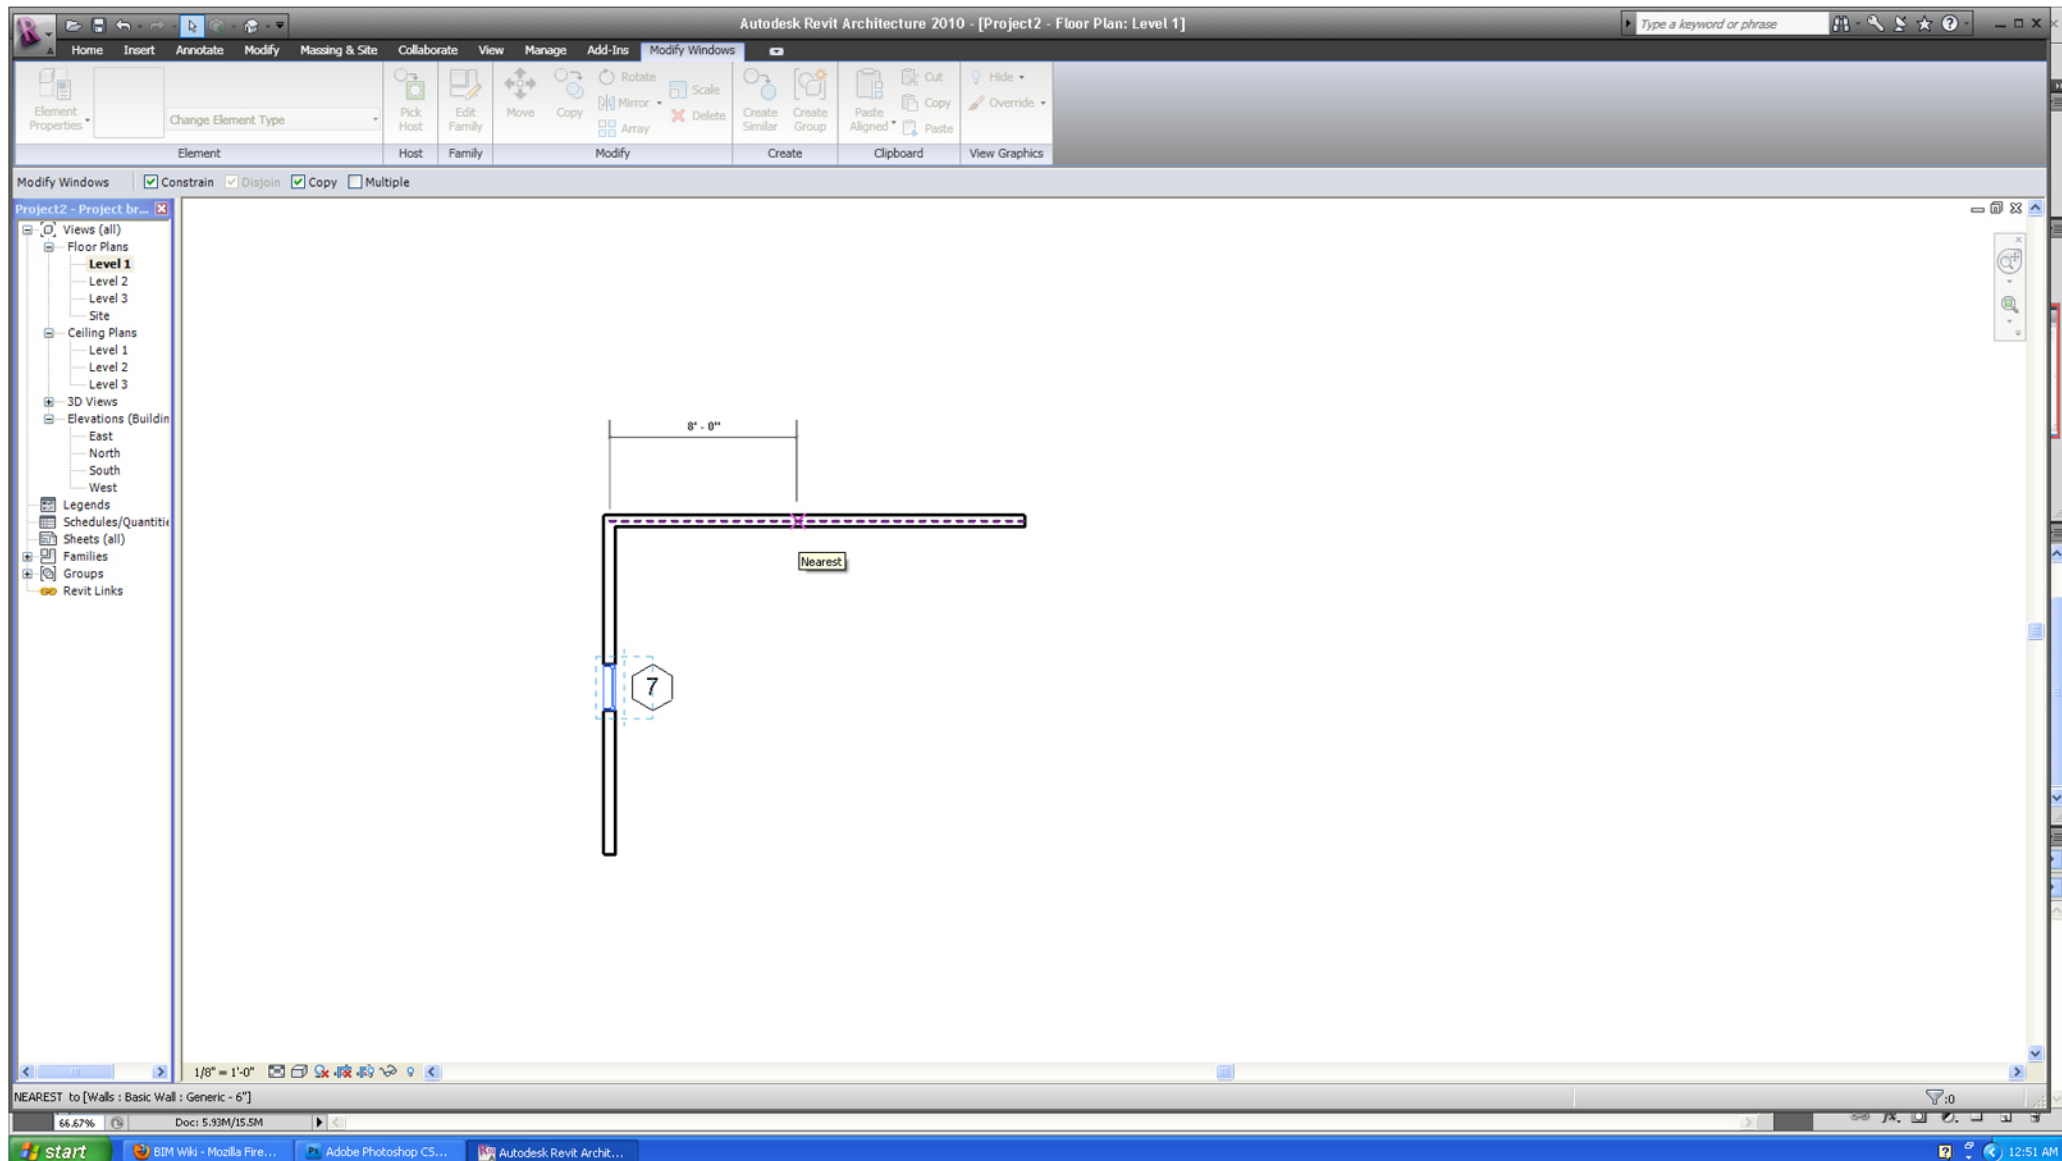

## Step 2: (What not to do)

### Select the copy tab

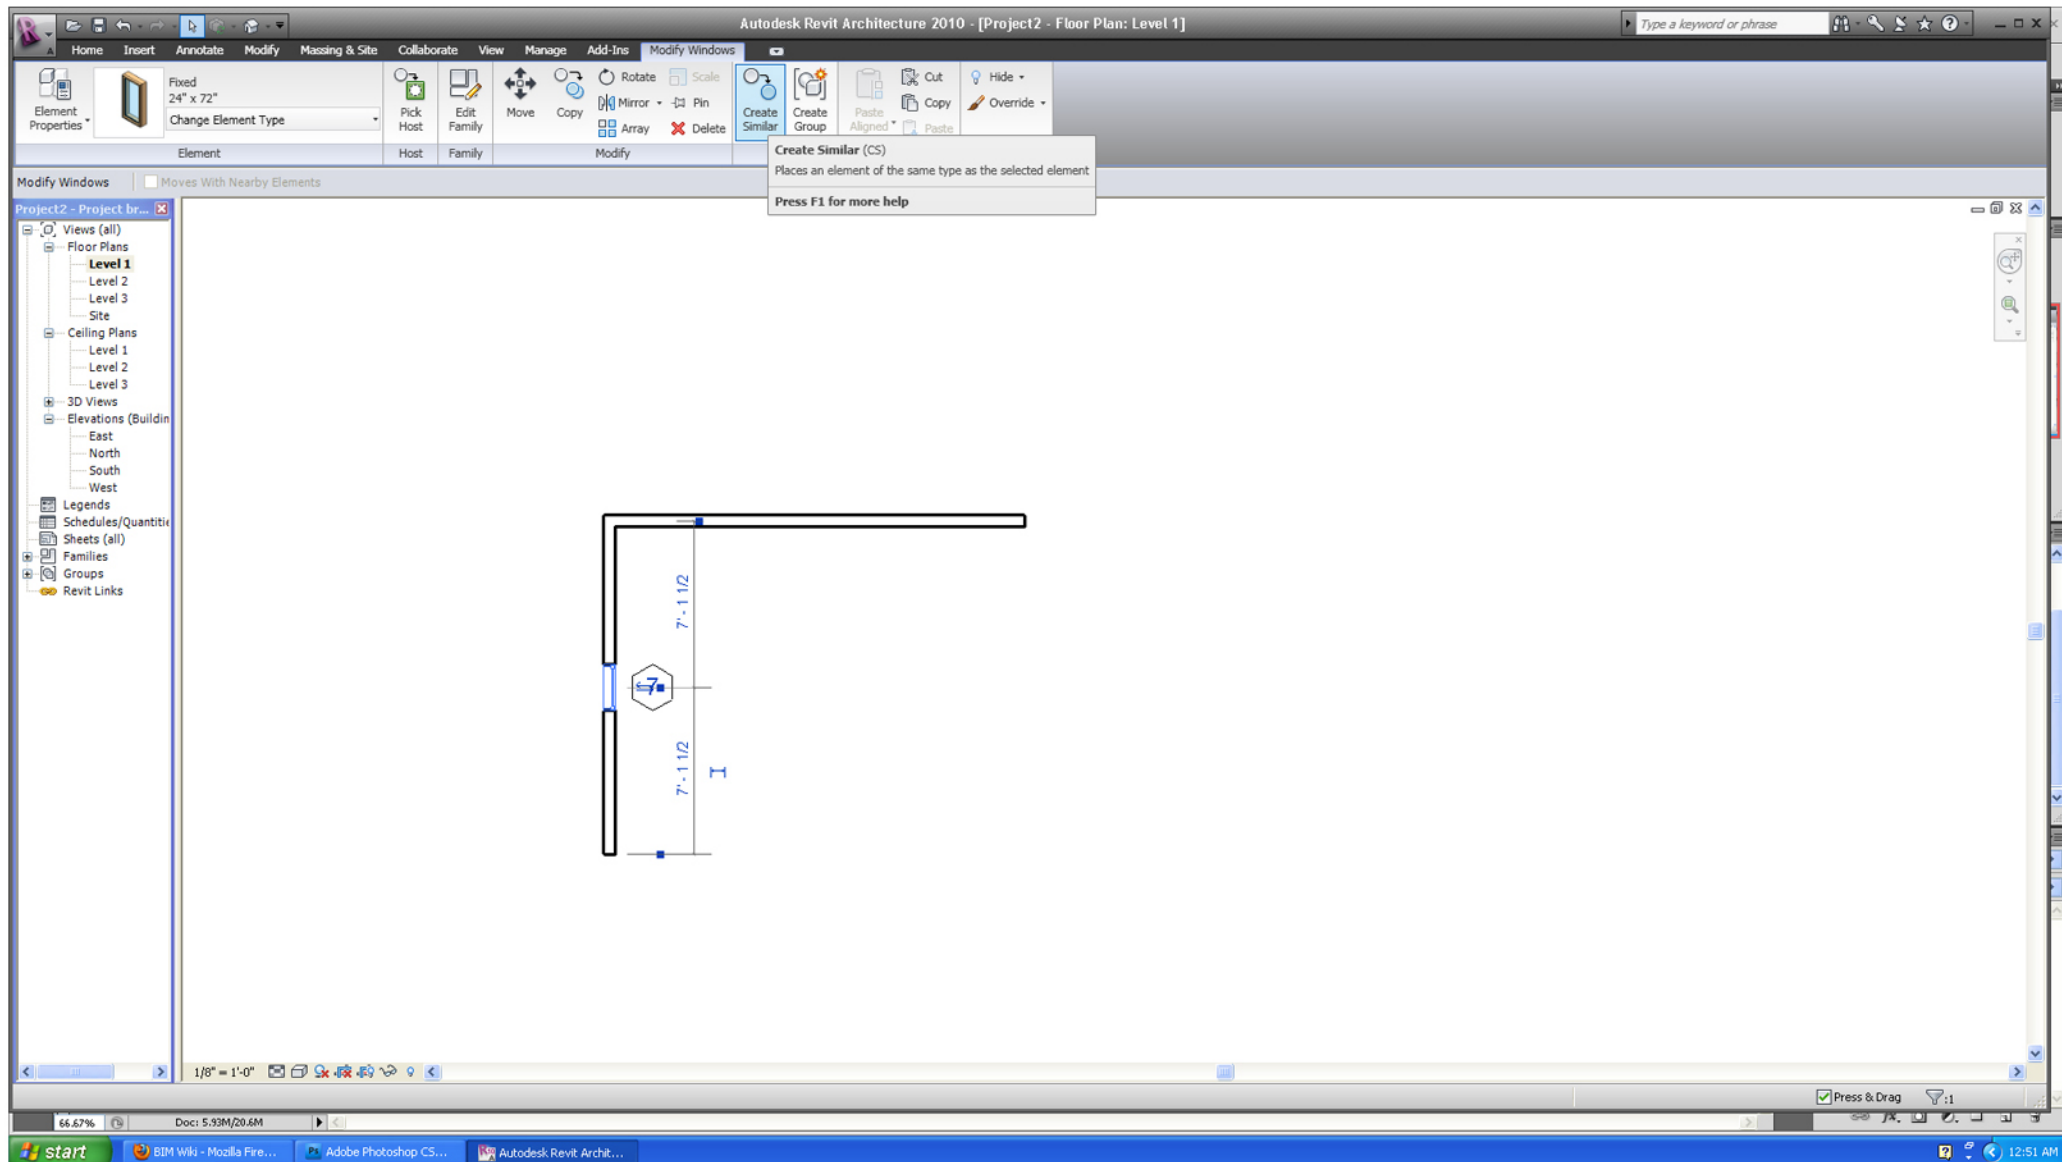

### Step 3: (What not to do)

Notice the Copy tool will not allow you to place the window on the perpendicular wall

Step 4: (What to do)  
Reselect the window  
Select the Create Similar tab

## Step 5: (What to do)

### Place the window on the perpendicular wall
